

'universal time'

ubiquitous free wifi

super wifi (white space) for non urban areas

remote working

remote software and applications

location based integration

remote collaborative real time working

consumer-creators

an internet of things

smart media on demand

better easier faster more

web technology:
html5/css3, more, simplified
no flash except for games
jquery/json for everything else
ipv6 - people & things have a domain
client side, content specific delivery
everything is responsive

5 years

<http://joethreat.files.wordpress.com/2011/07/ziggy.jpg>

I heard telephones, opera house, favourite melodies
I saw boys, toys electric irons and T.V.'s
My brain hurt like a warehouse
It had no room to spare
I had to cram so many things
To store everything in there

Where will the Web be in five years' time?
Where will the Web be in five years' time?
Where will the Web be in five years' time?
Where will the Web be in five years' time?

Where will the Web be in

5 years' time?

**What technological
and social changes
will be driving
emerging Internet
culture?**
